Hearing Technologies Centre

Jasna is a highly experienced audiologist with over 28 years' experience in the industry. She has consulted in Government and Private Practice, Public hospitals, Early Intervention Centres and schools.

She is also a registered Psychologist so Jasna's passion is that hearing well is more than just about the ears, it's about the whole auditory system working at its best. This is necessary to achieve optimal social interaction, learning, balance, quality of life and wellbeing.

Her recommendations are customized to the individual assessments of the hearing needs of each client whether child or adult. Her advice is reliable and independent as Jasna has no exclusive relationship with any one device manufacturer.

If you are wondering about the health of your or one your family member's hearing call Jasna for a chat or assessment.

Invisible Hearing Aids

Rechargeable Hearing Aids
